

TABLE I. General Statistics: 1963 and Earlier Years

Industry and year	Operating companies (number)	Establishments		All employees		Production, development, and exploration workers			Selected expenses					Value of shipments and receipts (\$1,000)	Value of net shipments and receipts (\$1,000)	Net production of coal (\$1,000)	Capital expenditures (\$1,000)	Energy used (million kwh equivalent)	Horsepower rating of power equipment (1,000 hp.)
		Total (number)	With 20 employees or more (number)	Total (number)	Payroll (\$1,000)	Total (number)	Man-hours (1,000)	Wages (\$1,000)	Value added in mining (\$1,000)	Supplies purchased for resale, and purchase (\$1,000)	Minerals received for preparation (\$1,000)	Contract work (\$1,000)	Purchased machinery installed (\$1,000)						
1963:	6,863	7,374	1,268	145,64	821,098	128,953	237,18	700,84	1,727,22	494,38	349,48	88,363	206,91	2,632,93	2,272,78	482,376	233,45	18,763	7,005

Note: For explanation of column captions see appendix A. For more detailed historical statistics for these industries, see Table 1 of the corresponding chapter of the 1954 Census of Mineral Industries, Vol. I.

- Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.
- Represents gross shipments and receipts less coal transferred to other establishments for preparation and less purchases for resale. For 1939 and earlier years, represents value of products and receipts.
- Represents the clean-coal equivalent of all coal mined, based on the location of the mine, including coal produced and used at the same establishment for power or heat.
- Coal mined by the Coal Mining Services Industries is included in the production shown for the Coal Industries.
- Excludes data for Alaska.
- Represents number of mines, culm banks, and dredges.
- Represents producing operations only.
- For the Bituminous Coal and Lignite Industries, represents number of mines.
- Represents anthracite stripping services only.
- Excludes purchased electric energy. For 1929, the quantity of purchased electric energy amounted to only 3 percent of the total kwh equivalent of energy used.
- For 1902, data were also obtained from the operators of coal mines on the average number of employees at contract service operations performed for them. The total number of such employees was reported as 6,906.
- Figures for average employment were converted to a 300-day basis for establishments which operated for a shorter period.
- Includes data for 9,920 "local mines and farmers' banks," producing about 2 percent of all bituminous coal and lignite, for which no data are available on labor and expenditures. For number of establishments, see also footnote 5.
- Includes data for 5,148 bituminous coal and lignite mines, producing 917 thousand tons of coal valued at \$1,093 thousand representing "irregular" operations for which no other data are available.
